

Digital Impact testing machine JBW-500B

Introduction:

JBW-B series PC controlled semi-automatic impact tester is mainly used to determine the anti-impact capability of ferrous metal materials with high toughness, especially for steel and iron and their alloy, under dynamic load. This series tester is operated semi-automatically, the pendulum of the machine can be raised or released automatically. Be applicable for continuing testing in different kinds of laboratories and other metallurgy industrial manufactures. It is designed and developed according to standard of ISO148, ASTM E23.

- *Pendulum rising, impact, free releasing etc. action can be controlled easily by PC mouse simple click, as well as the remote control box;
- *MSafety pin guarantees the impact action, standard protection shell to avoid any accident.
- *Pendulum will automatically rising and ready for next impact action after specimen breakout.
- *With two pendulums (big and small), PC software to display the energy loss, impact tenacity, rising angle, test average value etc. test data and result, also the curve display available; with calculation and report printing function. The dial scale can show test results too

Specifications:

Impact energy	250J/500J
Impact velocity	5.4m/s
Rising angle	150°
Specimen supporting seat span	40mm
Radius of supporting seat edge	R1.0~1.5mm
Radius of striker blade	R2.0~2.5mm
Distance from pendulum shaft center to impact center	750mm
Standard specimen dimensions	10×10×55mm
Power	380v, 50HZ, 3 phase/220v, 60HZ, 3 phase
Impact blade two face included angle	30°
Loadframe dimensions	2124×600×1340mm
Weight	750Kg
Impact blade thickness	16mm
Angle accuracy	±0.1°

Cualquier duda o aclaración favor de llamarnos, estamos para SERVIRLE

México: (+52) 55-5300-4517, 55-53004271, 55-5312-2536

Querétaro: (+52) 442-340-0250, 442-340-0251, 442-193-5678

Puebla: (+52) 222-219-9999, 222-887-0114, 222-228-1633

Digital Impact testing machine JBW-500B

Standard Accessories:

Load frame	1 set
500J pendulum	1 pc
250J pendulum	1 pc
Motor (on the loadframe)	1 set
Rising pendulum driving device (on the loadframe)	1 set
Automatic hitch pendulum device (on the loadframe)	1 set
Safety pin (on the loadframe)	1 set
Supporting seat adjusting device	1 pc
Specimen center device	1 pc
Photoelectronic sensor	1 set
Computer	1 set
Pinter	1 set
Software	1 set
Saftey cover	1 set
Device to dismantle pendulum	1 set
Packing list	1 pc
Software Operation manual (English Language)	
Operation manual (English Language)	1 pc

Specimen centering device

Device to dismantle pendulum

Manual control box

Supporting seat span adjusting device

Terra anchor bolts and cushion irons

Digital Impact testing machine JBW-500B

Software:

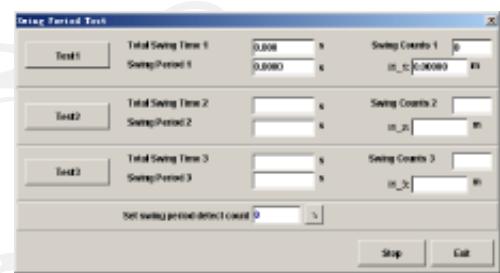

- 1, Windows version XP,Vista,7, screen display, operation with Mouse & Keyboard;
- 2, Test result can export to MS Word, [2007, 2010], does not support MS Office Home Edition;
- 3, The software support two or more pendulums in a model, set the accurate Local Acceleration due to gravity, fall angle,
- pendulum length,pendulum mass or weight,to obtain a more accurate test performance;
- 4, Support Min,Max,Mean,Standard Deviation for batch test;
- 5, High precision swing period auto-detection;
- 6, High precision energy loss auto-detection,auto-compensation;

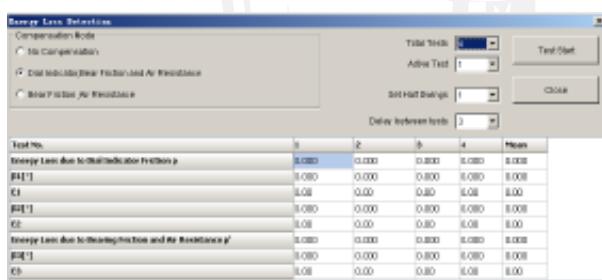

Main interface

Specimen Information Create

Swing Period Detect

Energy Loss detection
